INTRODUCING PETSBURGER

The ultimate dog food brand that will keep your furry best friend healthy and happy!

At PetsBurger, we believe that good nutrition is the foundation of a healthy and happy life for your dog. That's why we have created a premium line of dog food that is packed with all the essential nutrients and vitamins that your dog needs to thrive.

Our dog food is made from the highest quality, natural ingredients, and we never use any artificial flavors or preservatives. We understand that each dog is unique, so we offer a wide range of products to suit different breeds, sizes, and lifestyles. Whether your furry friend is a picky eater, has a sensitive stomach, or needs a special diet, we have got you covered!

And the best part? Our promo sale is now live! Get up to 30% off on all our products and give your dog the gift of a healthy life. Our dog food is not only delicious but also easy to digest, ensuring that your dog's body can absorb all the nutrients it needs.

So, what are you waiting for? Head over to our website and take advantage of our promo sale today. Your furry best friend will thank you for it!

ABOUT US / OUR STORY

Our story started thanks to our Kangal dogs, which are common in Turkey. We adopted three of the dogs we bred around our factory and raised them as our friends. We named them Bozo (Blonde) Pasha (Pasha) and Duman (Smoke), which were our nicknames in high school. We fed our friends with the food we ate, but we realized that their health did not improve. Then we tried various dog foods on the market. Unfortunately, our friends continued to lose weight. This situation made us very sad and we started to look for solutions to solve the problem. We applied to a veterinarian friend who is an expert in his field. Our friend wrote us a protein-rich formula and we had it specially produced by a food factory. We gave the food we produced to our dog owner friends and they also used this food for a certain period. The results were awesome! Our friends' toilet problems were resolved, their discomfort were decreased and they started to eat healthily. Our special production foods spread from ear to ear, and there was a great demand. In order to help more of our canine friends, we established a company, and approached the work more professionally and developed our formula. We used to give Bozo and Duman some of the burgers we ate sometimes. Their favorite food was the burger, as was ours. We also produced burgers that are beneficial for their health and named our company PetsBurger, inspired by them. The positive reviews from the consumers and the results supporting our formula from the laboratories carried us to America. As PetsBurger, we aim to deliver our healthy and quality products to our friends all over the world.

PRODUCTION

Our formulas with more than a hundred special ingredients that we have prepared for our friends are produced with the latest technology “Twin Screw Extrusion” system. This system, customized for pet food, supports the production of food that is nutritionally balanced and at the same time attractive to pet owners. It is realized through advanced automation system and perfect process control systems. With our Latest Technology Production Facility;

- 🐾 Productive; continuous production,
- 🐾 Product flexibility; balanced production of a wide variety of raw materials and formulas
- 🐾 Production flexibility in different molds,
- 🐾 Excellent process control with advanced automation, consistency and repeatability in product features and quality,
- 🐾 Contributing to “Sustainable Development” by reducing water and energy consumption, production that is sensitive to animals, nature and the environment is carried out.

QUALITY & R&D

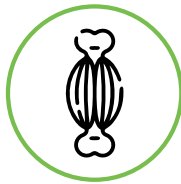

As the Petsburgers family, we take care of the quality of all the foods we produce and carefully check whether they meet our quality standards. The compatibility of the analysis results of the incoming raw materials with the desired values and the quality control of the foods we produce are carried out by our expert team in our laboratory, which has state-of-the-art devices. The detailed control of every process from the product entering our factory to the final product supplied to the market is a part of our food safety management system, which is accepted in accordance with international standards.

The food we produce consists of raw materials with the highest quality and nutrient digestibility and is formulated in accordance with the nutritional needs of our friends. Our over one hundred special ingredient rations have been created in accordance with AFCCO guidelines. These special ingredients, produced for our friends, are verified by R&D studies and are updated depending on the ever-evolving needs.
